

14-day institutional evaluation pilot

A contained, no-cost evaluation that lets one instructor test classroom setup, learner activation, auto-grading and cohort reporting before a purchasing decision.

PRICE \$0	DURATION 14 days	PARTICIPANTS 1 instructor and up to 4 learners	ACCESS Free-tier evaluation
---------------------	----------------------------	--	---------------------------------------

Included

- A free organisation with a five-member limit: one instructor and up to four learners.
- Email invitations, a short learning path and the live instructor progress dashboard.
- Free-tier PLC lessons and introductory auto-graded ladder-logic scenarios.
- A downloadable cohort progress CSV at the end of the evaluation.
- Email support from Paul during setup and review.

Not included

- The complete Pro scenario library, fault injection, solutions or other paid content.
- LTI launch, automatic LMS gradebook passback, SAML SSO or directory provisioning.
- Accreditation, vendor certification or replacement of hands-on wiring and commissioning labs.
- A contractual uptime or support SLA during the free evaluation.

Evaluation schedule

When	Activity
Before day 1	Confirm the instructor, learner group and the PLC topic being evaluated.
Day 1	Create the organisation, invite learners and assign the evaluation path.
Days 2-10	Learners complete the introductory ladder-logic exercises in the browser.
Days 11-13	Instructor reviews progress, failed attempts and the cohort export.
Day 14	Thirty-minute review: continue free, stop, or request a managed Teams quotation.

Suggested decision criteria

Measure	Target for this evaluation
Access	At least 3 of 4 invited learners sign in without IT installing desktop software.
Activation	At least 3 learners complete two successful exercises during the evaluation.
Feedback	Learners receive pass/fail reasons without the instructor manually loading project files.
Instructor value	The instructor can identify learner progress and export a usable cohort report.
Curriculum fit	The instructor identifies at least one module where browser practice complements existing teaching.

After day 14

- Stop with no charge and keep each account on its individual Free tier.
- Continue using the Free tier for introductory practice.
- Request managed Teams access at \$199 per seat per year, billed annually, with a five-seat minimum. Bulk and academic quotations are available.

Important: This evaluates browser access, introductory PLC practice, auto-grading and reporting. It does not replace a physical wiring lab or represent an accredited or vendor-issued qualification.
